## SAKARNI - FOR PROTECTION & BEAUTIFICATION OF CONSTRUCTION

Sakarni is a name to reckon with when it comes to beautification and protection of infrastructure. Our roots are strongly connected to the construction business since over the last 4 decades.

In the last decade construction industry has witnessed a revolutionary change in the field of architecture and decorative applications. Today, protection and beautification products are well known to everybody breaking the division of economic classes. Sakarni has been able to provide a massive product range with best quality, at a most economical price because of complete dedication towards our goal, pure understanding of the market, highly skilled team and a constant focus on research and development.

## SAKARNI GYPSUM BOARD ACCESSORIES

Sakarni has further expanded the product line in collaboration with Gipskarton to provide end to end solution for using gypsum board and plaster of paris for construction of the most compelling and innovative interiors and ceilings. The availability of all types of metal framings and accessories ensures that we fulfill all needs of our customers and helps us to become the one stop shop for all gypsum products. We have the following range available :

- Fiberglass tape / drywall jointing tape
- Jointing compound
- Dry wall screw
- Metal profile

## FEATURES

- Suitable for decorative finish
- Easy and fast installation
- Uniqueness of design
- Technical excellence
- Eco friendly
- Lightweight
- Versatility
- Durability

## PARTNERING FOR A BETTER SOLUTION

After mastering the knowledge on gypsum and its products Sakarni has collaborated with Gipskarton to present Sakarni Gipskarton gypsum board which has not only been a milestone for the brand but also for the industry. Sakarni has strategically placed the biggest plant of gypsum boards in Northern India near Delhi in Neemrana. This plant is equipped with production capacity of 4 lakh boards per month.

We have diversified into various categories of gypsum boards to cater to the needs of the consumers like water resistant and fire resistant gypsum boards etc.

The in-house R&D unit has advanced testing facilities to adapt and assimilate the latest technology in the product range. The production line has exclusively been designed and installed by reputed French engineers maintaining European technology standards.

Sakarni Gipskarton gypsum boards are made with unique and special PENTALAYER technology which makes sure that the boards produced are the best fit for India's geographical and atmospheric conditions.

## PRODUCT RANGE FOR ALL YOUR NEEDS

We at Sakarni have introduced a wide product range which has helped us capture a large market share in a very short span of time.

Current products in our ever-expanding product range:

- Plaster of Paris
- Gypsum Vermiculite Plaster (N1)
- Plaster bond
- Gypsum Board
- White Cement
- Wall Putty Smooth
- Wall Putty Coarse
- White Wash
- White Cement-Based Paint
- Universal Stainer
- Water Based Primers
- Water Based Red Oxide Primer
- Emulsion paints
- Distemper paint
- Metallic Paints
- Designer Paints
- Texture Finishes
- Tile Adhesives
- Ready Mix plasters
- Tile Cleaner
- Construction and Waterproofing Solutions
- Specialized Coatings

## INNOVATION & QUALITY HAND IN HAND

It has been a part of our company's core to have a massive focus on research and development. The result is one of the widest product ranges in the industry and meeting the ever-changing needs of the market and customer. This has also led us to provide superior quality products because of the continuous improvement in existing products and introduction of new products by adopting new technologies and creating products for the future. We are also committed towards recruiting experts and innovators in our team. Not only this but our collaborations with the big players of the international market along with our state-of-the-art equipment has helped us meet global standards for our product range.

Sakarni products are marketed countrywide through a network of C&Fs, distributors, stockists and dealers to facilitate easy availability to our valued customers. The company also has a dedicated technical team to provide solution to every conceivable problem in the construction industry.

## CONSTRUCTION CHEMICALS

Sakarni has introduced a range of construction chemicals in the market keeping in mind the need of market and the consumers. These chemicals have an extensive functional scope in the field of construction and can be used in ongoing construction projects to accelerate the speed of construction, in repairing and retrofitting existing buildings and also in new construction ventures for various purposes. Construction chemicals are used along with other building materials to improve workability, increase efficiency, add effectiveness, enhance durability, provide strength and protect the structure.

Construction chemicals have an underlying range of products which vary from admixtures, flooring chemicals, grouts, sealants, waterproofing chemicals and chemicals used for repair and maintenance of structures. Sakarni has introduced a wide range of construction chemicals which have been prepared using latest technology and updated formulations:

- SAKPROOF (Integral waterproofing compound)
- SAKCRETE (DRB) SBR latex based multipurpose repair coating
- SAKCOTE-2K (Polymer modified flexible cementitious waterproof coating)
- SAKSILOCOAT (Silane water repellent Impregnating coating)
- SAKCRACK BLOCK (ready to use crack filler)
- SAKDAMP KAWACH (Damp proof coatings for roofs and walls)
- Tile Adhesives & Ready Mix Plasters
- SAK BACK TILE BOND (for extra bonding and strength)

## TEXTURE COATING (HIGH BUILD FINISHES)

Sakarni has also introduced a wide range of high build textures, stone and other such customized finishes, which give a wide range of product options to select from and build your dream home having innovative appearance along with durability.

### Few of the products

- Natural stone and granite finish
- Concrete Finish
- Rustic and superfine finishes
- Stone look alike like Travertine's & other antique finishes.

## PREMIUM ITALIAN DESIGNER FINISHES

Sakarni has also introduced a range of premium Metallic Emulsion and a wide range of Italian designer coatings and concepts.

## CUSTOMIZED OPTIONS

Besides the above mentioned range Sakarni also provides customized and innovative solutions like efflorescence resistant coating, Elastomeric coating, Anti carbonation coating, Heat Insulation coatings, Acoustic paints, Dirt resistance coating, Water based PU coatings, Anti-Graffiti coatings, Hygiene coatings, Fire Intumescent coatings and many more as per requirements of the users.

## PLASTER OF PARIS

Sakarni has always been in limelight for delivering the absolute best range of POP to its customers. Our dedication and commitment towards providing modern and state of the art products to the market has been significant and this has compelled us to develop an unmatched and exclusive range of POP with all the acquired know how for every strata in the society which helps to fulfill the requirement of every customer, this is why the customers have accurately termed Sakarni as the master of plasters and made us the No.1 brand in northern India. Sakarni POP is made with the finest of gypsum ore possessing outstanding characteristics. This in turn, accords outstanding qualities like exceptional whiteness, reduced dead weight due to lightweight of plaster, expanded coverage and many more.

## FEATURES

- Excellent bonding with surface
- Excellent acoustic properties
- Consistent & smooth finish
- No shrinkage & cracks
- Enhanced aesthetics
- Lesser dead weight
- Thermal resistance
- Excellent strength
- Super white finish
- Fire resistant
- User friendly
- Economical
- Eco-friendly
- Lightweight
- Durable

## AVAILABLE PACKING

2kg., 5kg., 25kg. and 40 kg.

## MARVEL PLASTER OF PARIS

Sakarni has always been in limelight for delivering the absolute best POP to its customers. Our dedication and commitment towards providing modern and state of the art products to the market has been significant in the last decade. This has compelled us to concentrate more on our research and development. Sakarni has developed an unmatched and exclusive POP with all the acquired know how and accurately termed it as MARVEL. Marvel is an exceptional and unrivalled product made with the finest of gypsum ore possessing outstanding characteristics and with an availability of less than 7%. This in turn, accords outstanding qualities like whiteness greater than 90%, reduced dead weight, expanded coverage and many more to MARVEL. This product is first of it's kind in the POP industry and is exclusively being offered by Sakarni and will surely re-define the standards of POP.

## FEATURES

- Excellent bonding with surface
- Consistent fine & smooth finish
- Excellent acoustic properties
- Ultra super-white finish
- No shrinkage & cracks
- Enhanced aesthetics
- Lesser dead weight
- Thermal resistance
- Excellent strength
- Fire resistant
- User friendly
- Economical
- Eco-friendly
- Lightweight
- More pure

## AVAILABLE PACKING

## WALL PUTTY

Armed with an experience of many decades, the company's R&D division is consistently dedicated to produce new age products. Sakarni Wall Putty being one of those product range which are prepared with an international grade of formulation where quality is of paramount at every step beginning with the detailed selection to the procurement of the raw material to delivery of the end product at your doorstep. In Sakarni Wall Putty ingredients like white cement, polymers and advanced chemicals come together to create magic and an amazing bond, which when applied on surfaces provides smooth, water resistant and efflorescence resistant surface. The walls get a prolonged life and aesthetic look due to its application. Stringent quality controls are ensured at every step of manufacturing to prepare a perfect homogeneous mixture of all the chemicals and manufacture the absolute best in class putty.

## FEATURES

- Hydrophobic effect, easy gauging with water
- Reduced capillary water absorption
- Guaranteed permeability
- Good drying behaviour
- Long lasting protection
- Enhances ambience
- Excellent adhesion
- Better cohesion
- Highly versatile
- Easy handling

## AVAILABLE PACKING

1kg., 5kg., 20kg., 30kg. and 40kg.

## SUGANDHA WALL PUTTY

Sakarni Sugandha wall putty is best described as a product that will keep a soothing fragrance in your lives. The unique formulation of Sakarni sugandha putty adds an element of constant good aroma to the walls and to any surface on which it is applied. It keeps away bad odour from your homes and maintains a soothing fragrance which is sure to uplift your mood, improve your focus and impress your visitors. The superior finish, whiteness and scent make it the ultimate putty for your walls.

Sakarni Sugandha putty is available in three different fragrances :

- Lemon
- Rose
- Chandan

## FEATURES

- Resists dampness on painted surface
- Reduces the consumption of paints
- No curing required after application
- Enhanced adhesion and durability
- Binds strongly with the base
- Constant pleasant scent
- Rich result of coloring
- Superior Whiteness
- Prevents flaking

## AVAILABLE PACKING

1kg., 5kg., 20kg., 30kg. and 40kg.

महक भी ! सुरक्षा भी !

## AQUASHIELD WATERPROOF PUTTY

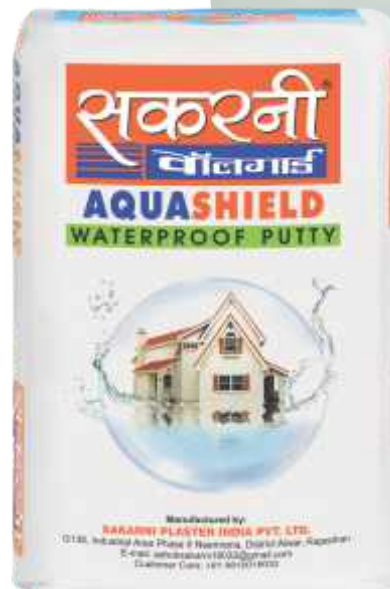

One of the major issues faced after finishing a surface with wall putty is that the putty surface is damaged by water and moisture mainly in case of exterior surfaces which speeds up the deterioration process, increases cracks and loosens the bond between the surface and the protective putty layer. Sakarni has found a one stop solution to this extraordinary problem by introducing Sakarni Aquashield water repellent putty. It contains special additives which make it hydrophobic in nature and it repels water and moisture away from the surface. This remarkable product can be applied indoors as well as on outdoors as it is customized to go through the wear and tear of the outside weather and still stay strong. This exceptional putty will not allow the plaster to absorb water and moisture in the air and also repel any water (like rainwater) touching its surface. Sakarni water repellent putty helps to provide a longer life to your home, is user friendly, and super easy to apply just like normal wall putty. It can also be used in coastal areas and other places with similar high moisture content. Sakarni water repellent putty is also specially designed to exhibit higher strength and greater bonding.

### FEATURES

- Water repellent & Damp proof
- Smooth and solid surface
- Increased life of paint
- Breathable surface
- Anti-efflorescent
- More coverage
- Anti flaking
- Rich look

### AVAILABLE PACKING

1kg., 5kg., 20kg., 30kg. and 40kg.

## SOMO WALL PUTTY

Sakarni Somo is the result of extensive and dedicated research and development and is the first putty to proudly display the ISI certification which is a proof of its purity and quality. It has unique properties which makes it a putty that matches international standards. This is a revolutionary product for the Indian market as it gives complete protection for all kind of exterior and interior walls. Its unique formulation contains higher doses of white cement and extremely high quality polymers which provides longer life to the skim coat and helps to achieve crack free mirror like finish . It also displays enhanced workability and is non hazardous for the environment.

### FEATURES

- Voc free
- Anti-flaking
- Mirror finish
- Cost saving
- Super white
- No shrinkage
- High strength
- Anti-microbial
- More coverage
- Strong bonding
- No water curing
- Extended pot life
- Damp resistant
- Peel & crack tolerant
- Consumes less paint
- Extra thick application
- Long lasting protection
- Lumps free easy mixing

## SAKCOARSE PUTTY

SAKCOARSE PUTTY is a white cement and polymer based putty which is specially designed for leveling larger undulations on plasters, concrete casting or precast.

### FEATURES

- Better Finish
- Hacking Free
- User Friendly
- High Coverage
- Robust Bonding
- Water Repellent
- Shrinkage Resistant
- Consumes Less Paint
- Peel & Crack Tolerant
- Good Thermal insulation
- Water Curing Not Required
- High Compressive Strength

### AVAILABLE PACKING

20kg.

## GYPSUM VERMICULITE PLASTER N1

SAKARNI GYPSUM VERMICULITE PLASTER made with refined and processed gypsum and vermiculite along with mix of premium quality special binders and additives to provide easier application, better bonding and smooth finish. Sakarni gypsum plaster helps in instant plastering of interior walls saving your time, money, labour and also giving your home the beauty that you desire. Each batch of Sakarni gypsum plaster goes through stringent quality control procedures in every step from selection of raw materials to its processing and packaging, using latest technology and equipments. Sakarni Plaster is supplied in moisture-proof, fully sealed and tamper-proof packs.

### FEATURES

- Lesser dead load on the structure as it is lightweight plaster
- Direct application on brick block, RCC and other surfaces
- Low thermal conductivity helps to save electricity
- Excellent strength after drying
- Great bonding with surface
- No water curing required
- Good thermal resistance
- Increased carpet area
- No shrinkage cracks
- Super white finish
- Smooth finish
- Fire resistant
- User friendly
- Time saving
- Eco-friendly
- Economical

### AVAILABLE PACKING

## READY MIX CEMENT PLASTER

SAKARNI INSTAPLAST is a ready mix cement plaster made with refined processed graded sand along with premium quality cement and a mix of special binders and additives to improve workability. Sakarni Instaplast helps in instant plastering of interior and exterior walls saving your time, money, labour and also giving your home protection and a great smooth finish.

## FEATURES

- Less wastage
- Saves time of construction
- Water resistant
- Cost effective
- Less labour required
- Convenient and easy to use
- Better quality and performance than traditional plaster
- Finishing of the plaster is smoother and consistent
- Sakarni ready mix cement plaster is made with clean and processed graded sand along with premium quality cement.
- Prepared with a mix of special binders and additives. Sakarni ready mix cement plaster is water resistant and peel proof.
- Due to right composition and high quality of materials used, Sakarni ready mix cement plaster is more durable and quality consistent.
- It binds strongly with the base.

## AVAILABLE PACKING

40kg.

## PLASTER BOND

SAKARNI PLASTER BOND a unique combination of aqueous polymer dispersion and pure acrylic emulsion containing limestone aggregates gives a light textured, tough, weather resistant and flexible plaster bond which is ideal for application on any type of surface. Sakarni Plaster Bond film is permeable in nature. It is an excellent barrier to chloride, carbonate and other salt migration. It enhances the life of the plaster and also saves working time as it imparts a strong chemical and mechanical bond, thus eliminating the process of surface preparation and enhancing the bond between plaster and substrate. In today's construction techniques the focus is on rapid and stable construction, the problem arises in finishing of such structures where an extra process has to be undertaken for beautification, protection and plastering purposes. Generally, manual methods like hacking are applied in such cases which is time consuming, labour intensive, expensive and in some cases it can damage the structure as well. Sakarni plaster bond eliminates the need for such extra processes like hacking and thus helps in quicker finishing.

## FEATURES

- Suitable for application all surfaces including low suction surfaces like RCC, columns, beams, slabs, shear walls, stone, wood, glass etc.
- Light colour of the compound allows easy identification on the applied surface
- Suitable for all kinds of plasters like cement plaster, gypsum plaster etc.
- Strong bond formation protects the surface from debonding or bulging
- No stickiness after proper drying (at least 24 hours required for drying)
- Dual bonding (mechanical as well as chemical bonding)
- Very durable, results can be achieved in a single coat
- Low thermal conductivity helps to save electricity
- Time saver and many times faster than hacking
- Creates a water resistant core
- Resistant to efflorescence
- No water curing required
- User friendly

## AVAILABLE PACKING

1kg., 5kg., 10kg. and 20kg.

## WHITE WASH

SAKARNI WHITE WASH is a premium, ready-to-use whitewash, crafted using advanced Italian technology in India's first fully integrated state-of-the-art facility. It is meticulously designed to deliver exceptional durability, remarkable lustre, and an economical wall finish, setting it apart from ordinary lime wash.

## FEATURES

- Long-lasting
- Self-bonding
- Easy application
- Value for money
- Ultra-Bright Finish
- Ultra-rich whiteness
- Effortless Application
- Unmatched Durability
- Application on wet/moist surfaces
- Serves as an excellent base coat for paint
- Resistant to peeling, flaking, and washing away

## SAKCEM (WHITE CEMENT BASED PAINT)

SAKCEM is a premium waterproof cement paint for use on interior & exterior surfaces of the buildings. Its formulation results in easy mixing, excellent hiding, excellent resistance to fungal & algae growth, longer pot life, easy brushability and extra covering capacity. It provides extra durability and longer life to the paint film.

### FEATURES

- High Coverage
- Durable
- Ultra Smooth Finish
- Eco Friendly
- No Odour
- No VOC

### AVAILABLE PACKING

25kg.

## WHITE CEMENT

SAKARNI WHITE CEMENT is being produced in state of the art manufacturing plant with highest quality of raw materials. We are providing a product with superior whiteness, strength and quality to the Indian market. Sakarni white cement is manufactured from purest lime stones (purity greater than 95%) which gives better strength and lesser  $\text{Fe}_2\text{O}_3$  content contributing to superior whiteness.

It goes through stringent quality control processes which help us keep strict vigil at every step so that the consistent and finest product is delivered to the end customer. Sakarni white cement is over 92% pure white having unparalleled physical, chemical and mechanical characteristics. Superior laminated weather proof packaging of Sakarni white cement ensures that the bags are tamper proof, moisture proof and leak proof.

## FEATURES

- Low cement consumption as compared to ordinary cement
- Very low porosity resulting in no internal corrosion
- High workability and enhanced performance
- Environment friendly
- Crack resistant
- High strength
- Super fine
- Ultra white

## AVAILABLE PACKING

## TILE ADHESIVE SA 109

SAKARNI TILE ADHESIVE SA 109 is a single pack polymer based cementitious general purpose tile adhesive. It could be used as a thin or thick bed adhesive for fixing ceramic, mosaic, marble, granite, wall and floor tiles. It can be used up to a maximum 12 mm bed thickness.

Recommended for use on floor and walls up to a height of 3 mtrs.

## FEATURES

- Durability
- Self-curing
- Easy Joining
- Polymer Based
- Easy workability
- Consistent quality
- Excellent Bonding
- Time & cost saving
- Ease of application
- Zero/ minimum wastage

## AVAILABLE PACKING

20kg.

एक बार चिपके

## TILE XTRAA TX 209

SAKARNI TILE ADHESIVE TX 209 is an improved polymer modified tile adhesive for large format range. It is suitable for all kind of ceramic and vitrified tiles, glass mosaic tiles, all kind of stone slab, dense and large dimension tiles etc. This premium grade tile adhesive is easy to use and designed to be a single component adhesive (just add water to make it ready for use). This adhesive is recommended for floor and wall application in interior and exterior.

## FEATURES

- Durability
- Self-curing
- Easy Joining
- Polymer Based
- Easy workability
- Consistent quality
- Excellent Bonding
- Time & cost saving
- Ease of application
- Zero/ minimum wastage

## AVAILABLE PACKING

20kg.

## TILE XTRAA TX 315

SAKARNI TILE XTRAA 315 is a single pack highly polymer modified and superior quality white cement based cementitious tile adhesive. It is formulated to be used as a tile adhesive for all types of ceramic, semi vitreous, mosaic, marble, granite, wall and floor tiles. It can be used up to a maximum of 12 mm bed thickness and is suitable for use in exterior and interior applications.

Recommended for use on floor and walls up to a height of 3 mtrs.

## FEATURES

- Water resistant - Suitable for wet areas
- Easy usage: Ready to use, Just add water on site
- Highly polymer modified to provide excellent adhesion - Excellent adhesion strength on concrete and plastered surfaces
- High strength makes it suitable for bonding with a variety of substrates and for fixing different kinds of tiles and stones
- Sag-resistant formula
- Sustains heat aging, making it an ideal product for high-temperature locations
- Low VOC - For healthy living
- IS conformity: Tested as per IS 15477:2019 TYPE 3 T

## AVAILABLE PACKING

20kg.

## SAKTILE GROUT

SAKTILE GROUT is a single component joint filling compound based on cement, polymer and speciality chemicals.

## FEATURES

- Pre-measured quantity ensures total quality.
- Highly resistant to water permeability.
- Excellent adhesive strength.
- Longer workable time.
- UV resistance
- Most properties improve with age.
- Non-staining
- Economical

## AVAILABLE PACKING

1kg.

## CHARM GOLD - EMULSION PAINT

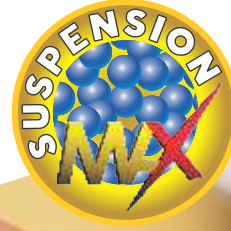

SAKARNI CHARM GOLD Exterior Emulsion Paint is based on modified acrylic emulsion which gives smooth and egg shell finish with a soft feel to the walls. It is specifically formulated by adding performance additives and binder which remain suspended and make a solid, adhesive film to protect and decorate the walls. Also, it is designed to provide excellent brushability, outstanding recoatability, enhanced look, greater durability and to withstand humidity, rain and hot climate. Antifungal and antibacterial additives present in Sakarni Charm Gold help to protect the surface and provide a longer life. This premium emulsion paint can be applied on exterior and interior surfaces finished with cement plaster, gypsum plaster, gypsum board, wall putty, concrete, asbestos sheet and also on already painted surfaces.

### FEATURES

- Higher coverage
- Extremely robust
- Low maintenance
- Breathable in nature
- Environment friendly
- Smooth and rich finish
- High weather resistance
- Excellent flow and brushability
- Resistance to bacterial and fungal growth
- Flexible - can withstand thermal movement

### AVAILABLE PACKING

1ltr., 4ltr., 10ltr. and 20ltr.

## CHARM GLOW - EMULSION PAINT

SAKARNI CHARM GLOW Exterior Emulsion Paint is based on modified acrylic emulsion which gives smooth and shiny finish with a soft feel to the walls. It is specifically formulated to provide excellent brushability, outstanding recoatability, enhanced look, greater durability and to withstand humidity, rain and hot climate. It also contains antifungal and antibacterial additives which protect the surface and help to provide a longer life. This economical and affordable emulsion paint can be applied on exterior and interior surfaces finished with cement plaster, gypsum plaster, gypsum board, wall putty, concrete, asbestos sheet and also on already painted surfaces.

### FEATURES

- Shiny finish
- Excellent flow and brushability
- Smooth and soft finish
- Higher coverage and economical
- Durability
- Breathable in nature
- Protection from fungal growth
- Environment friendly

### AVAILABLE PACKING

1ltr., 4ltr., 10ltr. and 20ltr.

## CHARM - EMULSION PAINT

SAKARNI CHARM Exterior Emulsion Paint is based on modified acrylic emulsion which gives smooth and matt finish with a soft feel to the walls. It is specifically formulated to provide excellent brushability, outstanding recoatability, enhanced look, greater durability and to withstand humidity, rain and hot climate. It also contains antifungal and antibacterial additives which protect the surface and help to provide a longer life. This economical and affordable emulsion paint can be applied on exterior and interior surfaces finished with cement plaster, gypsum plaster, gypsum board, wall putty, concrete, asbestos sheet and also on already painted surfaces.

### FEATURES

- Breathable in nature
- Environment friendly
- Smooth and soft finish
- Protection from fungal growth
- Excellent flow and brushability
- Robust durability and longer life
- Higher coverage and economical

### AVAILABLE PACKING

1ltr., 4ltr., 10ltr. and 20ltr.

## QUICK CLEAN - EMULSION PAINT

SAKARNI QUICK CLEAN is a solvent free modified acrylic polymer-based interior emulsion paint. Sakarni Quick Clean interior emulsion paint gives smooth and satin finish with a soft feel to the walls. It is a highly burnish resistant paint which makes it very easy to clean. It is applied on interior walls and provides very high coverage. It can be applied on cement plaster, gypsum plaster, gypsum board, surface finished with wall putty, already painted surfaces, concrete surfaces and asbestos sheet.

## FEATURES

- Excellent flow and brushability
- Odour free
- Quick clean
- Smooth and soft finish
- Higher coverage
- Durable
- Flexible
- Rich look
- Protection from fungal growth
- Environment friendly

## AVAILABLE PACKING

1ltr., 4ltr., 10ltr. and 20ltr.

## MAGNA - EMULSION PAINT

SAKARNI MAGNA Interior Emulsion is a solvent free acrylic emulsion paint which ensures to provide smooth and matt finish with a soft feel to the walls. It is formulated and specifically designed to provide higher coverage, long life and elegant finish. It can be applied on interior walls finished with cement plaster, gypsum plaster, gypsum board, wall putty, concrete, asbestos sheet and also on already painted surfaces.

### FEATURES

- Breathable in nature
- Environment friendly
- Smooth and soft finish
- Protection from fungal growth
- Excellent flow and brushability
- Robust durability and longer life
- Higher coverage and economical

### AVAILABLE PACKING

1ltr., 4ltr., 10ltr. and 20ltr.

## MAGIC GRIP ACRYLIC CEMENT PRIMER

SAKARNI MAGIC GRIP water based acrylic cement primer is based on modified styrene acrylic emulsion. It has been specially designed as a surface primer with excellent hiding and spreading capacities. The fine particle size allows good penetration into porous and chalky substrates to consolidate the plaster, give even shade to the surface and provide a uniform absorption over the whole surface. These properties enhance the top coats adhesion, durability and also create strong surface bonding. Sakarni primer is specially reinforced with inert pigments and extenders and has been designed to provide super sealing properties, excellent resistance from moisture and to keep the walls free from defects. The very fine particle size of Sakarni primer also allows penetration into substrates to enhance the physical barrier to water transportation and act as a chemical barrier to salt migration.

### FEATURES

- Low VOC
- Better hiding
- High opacity
- Strong adhesion
- Superior whiteness
- Interlocking particles
- Strong surface bonding

### AVAILABLE PACKING

1ltr., 4ltr., 10ltr. and 20ltr.

## MAGIC COAT ACRYLIC CEMENT PRIMER

SAKARNI MAGIC COAT carefully formulated interior water based acrylic cement primer based on modified styrene acrylic emulsion which can be used for application on interior surfaces. It has been specifically designed as a surface primer with excellent hiding and spreading capacity. The fine particle size allows outstanding penetration into porous and chalky substrates to consolidate the plaster and gives even shade to the surface. It is reinforced with inert pigments and extenders and also gives excellent covering capacity along with uniform absorption over the whole surface. These properties enhance the top coats adhesion and durability.

### FEATURES

- Low VOC
- Better hiding
- High opacity
- Strong adhesion
- Superior whiteness
- Interlocking particles
- Strong surface bonding

## PRO PROTECT - RED OXIDE PRIMER

SAKARNI PRO PROTECT red oxide primer is a premium quality polymer based, non-flammable and water soluble primer. Designed to be applied on Metal surfaces such as mild steel, casting, GI, Aluminum surface etc. It is ecofriendly, fast drying, easy to apply, durable, thermally stable and demonstrates excellent hardness, corrosion and rust protection properties when compared to conventional solvent based primer.

It can be top-coated with Water Based or Solvent Based Enamels.

Recommended Applications include Railway Wagon, Vehicles, Trailers, Railings, Bridges, Equipment, Overhead Cranes, Pipelines, Storage Tanks, Transmission Towers, Fences, Chairs, Tables, Dumpsters, etc.

## FEATURES

- Non-Flammable
- Eco-Friendly
- Fast Drying
- UV Resistant
- Scratch and Impact Resistant
- Antibacterial
- Corrosion and Rust Proof
- Thermally Stable
- High Coverage
- Prevents Dry Skinning in Container

## AVAILABLE PACKING

1ltr., 4ltr., 10ltr., and 20ltr.

बरकरार सालों साल  
परत बेमिसाल

## WOOD GUARD PRIMER

SAKARNI WOOD GUARD primer a premium and environment friendly water-based acrylic primer that promotes excellent adhesion on wood substrates without the strong odour of solvent based primers. It is easily sandable and helps to provide a smooth finish.

## FEATURES

- Low VOC
- Low Odour
- Fast Drying
- Eco-Friendly
- Antibacterial
- High Coverage
- Excellent Adhesion
- Free From Harmful Chemicals
- Prevents Dry Skinning in Container

## AVAILABLE PACKING

1ltr., 4ltr., 10ltr., and 20ltr.

## HIGH PRIME - RED OXIDE PRIMER

SAKARNI HIGH PRIME is a general purpose solvent thinnable metal primer built with superior quality base of synthetic resin which is pigmented with Red Oxide and other rust inhibitive pigments. Sakarni High Prime provides excellent protection to exterior and interior of ferrous metal surfaces (like steel, cast iron, wrought iron etc.) during and after fabrication. It also offers good opacity, coverage, flow, leveling, and adhesion.

### FEATURES

- Durable
- Fast drying
- No skinning
- Easy to apply
- Longer shelf life
- Greater coverage
- High thermal stability
- Resistance to bacteria, fungus, moisture etc.
- Outstanding adhesion and anti-corrosive properties

### AVAILABLE PACKING

1ltr., 4ltr., 10ltr., and 20ltr.

## UNIVERSAL STAINER

SAKARNI UNIVERSAL STAINER is a glycol based binder free pigment concentrate having both non-ionic and anionic wetting agent and dispersing agent in optimum dosage. It contains pro colorants with active pigments which enhances the final color and helps to achieve multiple shades with accurate desired color output. Sakarni Universal Stainer is manufactured to right specifications such as color shade, color strength and rheology which guarantees both excellent color accuracy and color reproducibility. Due to the unique dispersion technique used in sakarni universal stainer complete deagglomeration of pigments takes place hence optimum color development is obtained from each pigment which in turn results in maximum tinting strength. Each batch of Sakarni universal stainer goes through stringent quality control procedures in every step from selection of raw materials to its processing and packaging, using latest technology and equipments which make the product free from defects such as flocculation, flooding, cratering, etc. and also ensures to maintain highest of standards.

## FEATURES

- Multiple attractive shades which can be mixed matched to achieve a range of colors
- Suitable to use with almost all kind of paints, primers and enamels
- Excellent long term viscosity stability over a wide temperature range
- Excellent color accuracy and color reproducibility
- High stability in a wide range of temperature
- Unlimited color matching compatibility
- Easy to use for on-site tinting
- Enhanced color output
- High tinting strength
- User friendly
- Low VOC

## AVAILABLE PACKING

50ml., 100ml., 200ml., and 500ml.

बूंद का कमाल,  
रंग का धमाल

## PEARL METALLIC EMULSIONS - GOLD & SILVER

SAKARNI PEARL GOLD is formulated with superior acrylic resins, reinforced with special pearl gold glitter & additives. It can be used for application on surfaces like wood, walls, concrete, gypsum boards etc.

SAKARNI PEARL SILVER is formulated with superior acrylic resins, reinforced with special silver pearl glitter & additives. It can be used for application on surfaces like wood, walls, concrete, gypsum boards etc.

Beside gold and silver other shades are also available.

### FEATURES

- Low VOC
- Lead Free
- Breathable
- Antibacterial
- Eco Friendly
- High Coverage
- Water Thinnable
- Excellence Adhesion
- Luxurious Metallic Look

### AVAILABLE PACKING

200ml., 1ltr., 4ltr., 10ltr. and 20ltr.

# Construction and Waterproofing Chemicals

## SAKPROOF

SAKPROOF is a highly effective integral liquid waterproofing compound for concrete and plaster. It is composed of special polymers, additives, surfactants and plasticizers and is formulated to make the concrete compact and prevent segregation.

## DOSAGE

Use SAKPROOF @ 0.4% by weight of cement or 200 ml per 50 kg bag of cement.

## FEATURES

- It reduces the permeability of water into concrete
- Reduces shrinkage and crack development
- It improves the quality and strength of the mix
- It improves workability & plasticity
- Render application becomes easy
- Non-toxic & easily soluble in water

## AVAILABLE PACKING

1ltr., 5ltr., 10ltr. and 20ltr.

## SAKCRETE (DRB)

SAKCRETE DRB is based on modified Styrene Butadiene Rubber (SBR) latex in ready to use liquid form. It is a unique and multipurpose product having multiple applications as a bonding agent for bonding of old concrete to new concrete, adhesive mortar for tiles, heavy duty floor topping, repair mortar, injection grouting, cement slurry for waterproofing of rooms, toilets, terraces etc. It is used to prevent cracking and to improve abrasion resistance.

## FEATURES

- Water proofing of toilets, terraces, floors, balconies, walls, roof etc.
- Good adhesion properties to most building materials.
- Good water resistance.
- Improved resistance to abrasion and chemical attack.
- Non-corrosive to steel & non-flammable.
- Allows the concrete to breathe
- Hardened film and mortar becomes more resilient.
- Prevents cracking by improving flexural strength.

## AVAILABLE PACKING

1kg., 5kg., 10kg. and 20kg.

सीलन, नमी, दरारों को  
**दे घुमा के!**

## SAKCOTE-2K

SAKCOTE-2K is a two-pack polymer modified cementitious based protective and waterproof membrane coating specially formulated for concrete and masonry surface. When it hardens, it develops excellent bonding property with most building materials. It is suitable in both interior and exterior of building and all other civil engineering applications. It develops slightly flexible film, which prevents dampness in buildings, tanks and other concrete structures permanently.

## FEATURES

- Excellent adhesion to sound and prepared surfaces
- Pre-measured packs - only need mixing
- Eco friendly-free from volatile organic compound (VOC)
- Easy to apply by brush
- Non-toxic, suitable for waterproofing of storage units containing drinking water
- Non-Corrosive to steel or iron, non-inflammable
- Protects against the effects of concrete carbonation, efflorescence or salt petering
- Protects superbly against water penetration

## AVAILABLE PACKING

Available in two pack system:  
3kg. and 15kg.

आपके घर का  
'Feel-Good Partner'

## SAKACRYCRETE

SAKACRYCRETE is a modified acrylic polymer based unique waterproof protective cementitious flexible coating system for cement and cement mortar. When in conjunction with cement, it provides properties to combat the shortcomings of plain cement, particularly its poor adhesion properties. It enhances the properties of cement slurry/mortar/concrete and makes them an excellent choice to use in new construction as well as renovation.

### FEATURES

- Highly waterproof system.
- Excellent adhesion properties to most building materials.
- Excellent water resistance.
- Highly durable against ultraviolet light.
- Non-corrosive to steel & non-inflammable.
- Allows the concrete to breathe.
- Crack resistant.

### AVAILABLE PACKING

1kg., 5kg. and 25kg.

## SAKEFFLORI PRIME

SAKEFFLORI PRIME is a superior quality and high performance water-based alkali-resistant primer containing acrylic polymer for unpainted exterior plaster surface to provide exceptional resistance to attacks by alkalis.

The special proprietary acrylic-based formulation with penetrative polymer permeates into the surface and improves resistance to alkali. Its non-chalking, high adhesion property resists peeling or flaking of top coat.

SAKEFFLORI PRIME applied to the substrate to ensure optimum performance of the complete coating system by stabilizing irregularities in substrate absorption, reinforcing mechanical strength and promoting inter-coat bonding.

## FEATURES

- Nano polymers that penetrate deep into building capillaries thus sealing the capillaries.
- Excellent adhesion to all substrates.
- Prevent debonding of the surface
- Retards efflorescence problem due to presence of residual alkali salts
- Recommended treatment for conditioning surfaces.
- Excellent flow over most porous surfaces.
- Lower odour formulation.
- High coverage.
- Compatible with a wide range of architectural top coats and conventional texture coatings.

## AVAILABLE PACKING

1ltr., 4ltr. and 20ltr.

## SAKCRACK BLOCK

SAKCRACK BLOCK is a ready to use crack filling & smoothing paste made with best quality polymers, special fillers & additives. It is flexible and fiber reinforced soft putty like material used for filling surface cracks.

## FEATURES

- Flexible
- Low VOC
- Less shrinkage
- No premixing required
- Lead free & Excellent adhesion with cementitious surface.

## AVAILABLE PACKING

1kg.

अब दरार से छुट्टी !

## SAKDAMP KAWACH

SAKDAMP KAWACH is a damp proof Elastomeric Heat Reflective Coating for exterior surfaces which is formulated by adding customised elastomeric resins, reinforced with special fibres& additives to be applied as a thick coat to give damp proof elastomeric and cool roof coating.

### AREA OF APPLICATIONS:

- All exterior surfaces, building roofs, terraces, sunshades, parapets and exterior vertical walls.
- It can also be applied on sound brick-batcoba or cementitious waterproofing.

### FEATURES & BENEFITS:

- Waterproofing protection of up to 7 bar hydrostatic pressure.
- High sheen, brilliant white colour results in high level of heat reflectance.
- Acts as an anticarbonation coating by reducing carbon dioxide and chloride ion diffusion thus protecting rebars against corrosion.
- Crack bridging ability due to elastomeric properties.
- Reinforced with fibres for superior abrasion resistance.
- Strong adhesion to masonry substrates.
- Single pack, easy to apply using brush/roller by simple recoating.
- User friendly, environmentally safe and non-polluting.
- Low VOC content. Eco-friendly product.

### AVAILABLE PACKING

1ltr., 4ltr. and 20ltr.

## SAKDAMP KAWACH PLUS

SAKDAMP KAWACH PLUS is a premium damp proof Elastomeric Heat Reflective Coating for exterior surfaces which is formulated by adding customised elastomeric resins, reinforced with special fibres & additives to be applied as a thick coat to give a damp proof elastomeric and cool roof coating.

### AREA OF APPLICATIONS:

- All exterior surfaces, building roofs, terraces, sunshades, parapets and exterior vertical walls.
- It can also be applied on sound brick-batcoba or cementitious waterproofing.

### FEATURES

- Waterproofing protection of up to 7 bar hydrostatic pressure.
- High sheen, brilliant white colour results in high level of heat reflectance.
- Acts as an anticarbonation coating by reducing carbon dioxide and chloride ion diffusion thus protecting rebars against corrosion.
- Crack bridging ability due to elastomeric properties.
- Reinforced with fibres for superior abrasion resistance.
- Strong adhesion to masonry substrates.
- Single pack, easy to apply using brush/roller by simple recoating.
- User friendly, environmentally safe and non-polluting.
- Low VOC. Eco-friendly product.

### AVAILABLE PACKING

1ltr., 4ltr. and 20ltr.

## SAK DUST KAWACH

SAK DUST KAWACH is a premium dust repellent, water thinnable Emulsion paint. Enriched with silicone and special additives which gives excellent dirt resistance performance in varying climatic conditions and provides a bright and fresh look to the surface. It gives a durable, washable, dirt resistance, high sheen finish for both interiors and exteriors of the building. It is an advanced multi feature paint that is resistant to algal and fungal growth too. Being a Cool Roof coating, it also saves electricity cost.

## FEATURES

- Dust Repellent, Heat Reflect Technology, Weather Resistant, Prevents Algae & Fungus Growth
- High Sheen Finish, Low VOC Long lasting

## AVAILABLE PACKING

1ltr., 4ltr. and 20ltr.

## SAKSILOCOAT

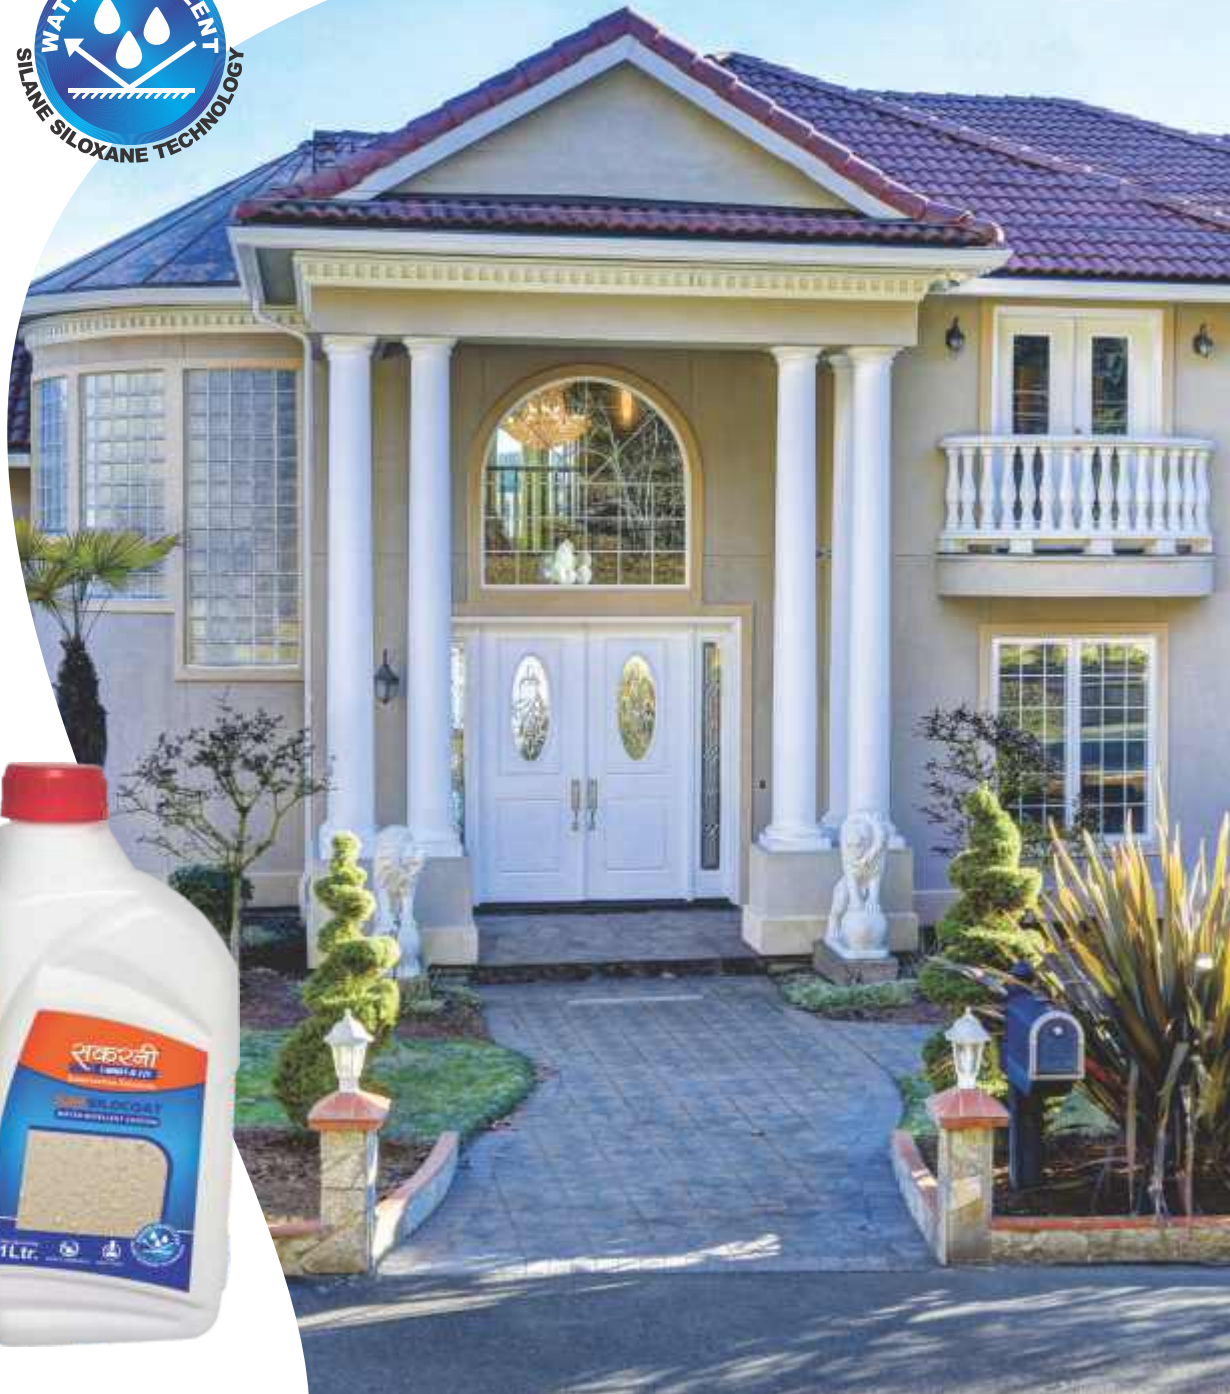

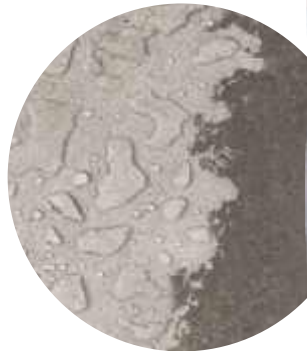

SAKSILOCOAT is supplied as a ready-to-use silicone resin solution which when applied, creates a highly water repellent surface. It is a non-film-forming impregnation product. Substrates remain permeable to air and water vapour. It is completely colorless after application and does not change the appearance or the composition of the treated surface.

## FEATURES

- Environment friendly, non-inflammable.
- Non-film-forming, lets a surface breathe.
- Self-cleaning, reduces unsightly staining, unaffected by salt laden atmosphere.
- Ready-to-use by brush or spray directly from container, most effective on any siliceous surfaces (old or new).
- Reduces risk of efflorescence, lime erosion, rust staining, dirt collection, formation of mildew, moss and lichen and frost spalling.

## AVAILABLE PACKING

1ltr.

## SAK BACK TILE BOND

SAK BACK TILE BOND is a single component bond formulated with customized resins and added additives for applying on back of vitrified tiles to improve the adhesion of tiles on walls and floors. After application of SAK BACK TILE BOND on the back of tile, it can be fixed either with cement sand mortar or tile adhesive.

## FEATURES

- Cost efficient.
- Easy to apply.
- Provides excellent adhesion for low water absorption tiles like vitrified tiles.
- Eco-friendly product: Does not contain APEO, Ammonia and Formaldehyde.
- Provides protection from debonding of tiles under different exposed conditions like, heat, water, vibrations, and impact.

## AVAILABLE PACKING

1ltr.

## TILE CLEANER

Sakarni Tile Cleaner is a fast acting acid based cleaner for regular cleaning of dirt and stains on tile surfaces. It is specially designed for daily maintenance of tiles and is ideal for interior and exterior use.

## FEATURES

- Strips wax and floor finishes.
- Cleans heavily soiled and neglected areas
- Cleans ground from substances like dirt, grease, soap scum, and other organic materials

## AVAILABLE PACKING

500ml., 1ltr., 3.5ltr. and 5ltr.

**MORE SHINE.  
MORE CLEAN.**

## SAKARNI GIPSKARTON GYPSUM BOARD

Sakarni Gipskarton gypsum board (also known as plasterboard, wallboard, gypsum panel, sheet rock, drywall) is a panel made of calcium sulfate dihydrate (gypsum) with additives and pressed between a facer and a backer (typically thick sheet of paper). It is mixed with fiber, plasticizer, foaming agent, and various additives that decrease surface fungi, increase fire resistance, and lower water absorption. Though the product is light weight yet it has a robust core, being closely adhered with the best quality paper-liners. Sakarni Gipskarton gyp-board has become an imperative component for standard light weight dry wall systems and is used in a wide range of architectural structures ranging from residential to commercial buildings, hospitals, airports, educational institutions and various other applications. Sakarni Gipskarton gyp-board is produced in accordance with American ASTM C1396 & European EN-520 standards and in three different variants :

- Gypsum board standard
- Gypsum board fire resistant
- Gypsum board moisture resistant

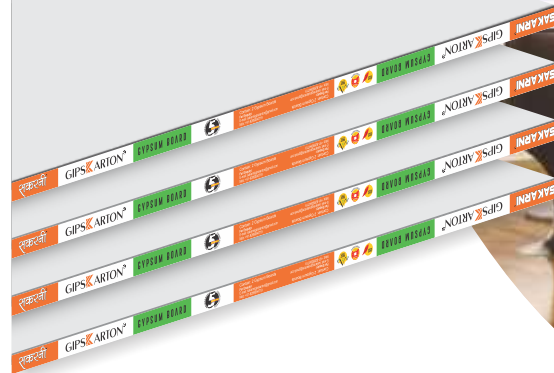

## FEATURES

- Suitable for Decorative Finishes
- Light Weight Construction
- Good Thermal Insulation
- Easy & Fast Installation
- Good Sound Insulation
- Environment Friendly
- Good Fire Protection

## AVAILABLE SIZE

6 x 4 feet.

Thickness 12.5mm
